

HIGH QUALITY WATER FOR DEMANDING APPLICATIONS

DMS Reverse Osmosis Systems are the perfect solution for delivering incredibly high quality water to your beverage, ice, and steam equipment. By reducing a wide spectrum of contaminants, the DMS will improve your water quality and keep take out your equipment clean.

Capable of removing over 90% of the contaminants present in the incoming water supply, the DMS is well suited for any application that requires a low amount of total dissolved solids. DMS reverse osmosis systems are reliable, compact, and capable of producing up to 1500 gallons of water per day.

High Quality Water

Three-stage treatment improves the quality of your water.

Blend Value

The DMS-RO System allows you to dial in the desired water quality.

Domestic Reverse Osmosis | DMS-RO

Features:

- Panel display of product water TDS for monitoring of RO efficiency
- Adjustable blend valve allows for fine-tuning of the product water TDS
- Long-lasting pre-filter cartridges need to be replaced only once per year

RO System Information

Model Part No.	Capacity (GPD)	Membrane	Pre-filter	Post-filter	Width (A)	Depth (B)	Height (C)	Weight (LBS)	Max Recovery	Pump	Motor Rating	Electric Supply
DMS-1500 9700591	1500 gpd	(1) 4.0" x 21" (101.6 x 533 mm)	(1) 20" Carbon/ Sediment (1) 10" Anti-Scalant	(1) 20" Carbon/ Sediment	18" (457 mm)	18" (457 mm)	31" (787 mm)	95 lbs (System Only)	N/A	325 gph	N/A	N/A

Operating Specifications

Model Part No.	Minimum Feed Pressure	Max Hardness	Operating Temperature	Max Chlorine	Max Total Dissolved Solids	pH Range	Slit Density Index	Turbidity	Iron, Manganese, Hydrogen Sulfide
DMS-1500 9700591	40	<10 Grains*	35°F-90°F	<1.0 PPM	2,500 PPM	4-11	<5.0 SDI	<1.0 NTU	0 PPM

* Softener is required if the hardness level is above the limit.
